

HUMMINGBIRD WHOLESALE HONEY

Most of our honey is from the Willamette Valley; one beekeeper is located in the Lower Columbia River Basin. All of our honey is produced and extracted by small family businesses. Unfiltered and raw (not heated over 115° OF) our honey still contains traces of Pollen and Propolis, and has no additives (unlike many commercial packers who add water to achieve the legal limit of 18% moisture).

Our Honeys can be purchased in jars under the name of Heavenly Honey, or in bulk, at the natural food stores listed below. *Not all stores carry both jars and bulk honey, or the full line of honey products.:*
