Beneficial Insect Plants of the Pacific Northwest

Wild pollinators and other beneficial insects are attracted to native and naturalized plants. Go native! Provide habitat and food for PNW insects that will help control invasive garden pests.

Beneficial insects include: bees, butterflies, ladybugs, lacewings, hoverflies, minute pirate bugs & damselbugs.

Red Osier Dogwood
Cornus sericea

Melissa officinalis

Oregon Iris
Iris tenax

 Native to Oregon  Especially Attractive to Native Bees
